

Because information is what counts

Global More offers you **optimal and diverse bandwidth configurations** to work with the **most demanding applications**, with a **small investment**. And if your Communication needs are greater, we have a bundle structure solution.

One of its main advantages and characteristics is a **variety of MB quotas** for all the traffic of information.

Quality service, technology and control of the amount and type of information that you wish to download and upload, are features that you will find in **Global More**, a solution on our newest **SkyEdge II platform**, taking your company to a competitive level, where the control of information and the amount of MB available are vital for the company's performance.

Characteristics

- Internet with bandwidth to choose from:
 - **Global More Supra 2048/256 Kbps.**
 - **Global More Pro 1024/128 Kbps.**
 - **Global More Max 512/128 Kbps.**
- Available quotas:
125, 185, 250, 340 y 435 MB.
- Web Filter.
- Optional remote end channel.

Advantages

- Service available with a small investment.
- Guaranteed permanent connection.
- Internet and REC Service for a single fee.
- The daily download quota applies from 6:00 a.m. to 8:00 p.m. (Central time) and it does not accumulate.
- The service is free of restrictions on Saturdays, Sundays and night hours.

Considerations

- Download and upload consumption is considered for the MB count.
- Services with a daily quota which, in the event that it is used up, the modem will restart and download and upload speeds will be restricted to 64/32 Kbps, until the quota is restored.

- In order for the service to be reestablished to the contracted bandwidth, the modem must be restarted a second time.
- In case the contracted service includes CPR, additional services include: Content Filtering, remote end channel, REC Equipment, REC Switch and Device.
- **Global More** with no REC Service, only includes Content Filtering.
- When service is restricted it is recommended not to use data and REC service at the same time.

Note: This solution only applies to SkyEdge II technology.
